Supplie	rs Declaration of Conformity for USGv6 Prod	lucts				USGv6-v1 SDOC-v1.10 Page 1					
1	The Document Requiring Conformity:				USGv6 Profile Version 1.0, July 2008. (NIST SP50						
2	Product Identifier: OS X Yosemite 10.10										
3	Supplier's Name, Address and SDOC Contact Details										
Apple Inc. 1 Infinite Loop, Cupertino, CA 95014 408-974-1010											
4	Product as Tested/Declared: Product Identifier, version/revision information, details of configuration tested.										
10.10											
5	Product Family (other products using same IF	v6 stack(s) to which thes	se results are de	eclared to a	pply). Chec	ck Product Family attestation below.					
N/A											
6	USGv6 Capability summary. (For each distinct IPv6 stack in the product provide a summary of its USGv6 capabilities below and include a detailed test result summary). e.g. example-prod-id/stack-1: USGv6-v1-Host: IPv6-Base+Addr-Arch+IPsec-v3+IKEv2+SLAC+Link=Ethemet.										
USGv6-v1-Host: IPv6-Base+Addr-Arch+SLAAC+Link=Ethernet											
7	Self Contained or Composite SDOC? (Must					地位自然和连续的任务的制度。但是这种通过可以					
YES	All of the declared USGv6 capabilities of this product are addressed by orginal test results reported in this SDOC.	unique USGvt	6 SDOCs. All of the	abilities of this product are provided by the use and/or integration of umodified components that have their own the relevant referenced SDOCs are identified in section 8 and attached. This product's page 2 will indicate by specific referenced components (product-id/stack-id).							
8	Additional Declarations / Attachments: (List	supplier & product-id/sta	ck-id for referen	renced and attached test results in the case of composite products).							
	Component Supplier	Product ID:	S	Stack ID:		Notes:					
[1]											
[2]		-	-								
[4]											
9	Supplementary Attestations (Answer all).										
	YES This product is fully functional in dual stack are invalidated ifthis product is operated in		N. N. A. S.	This product is fully functional in IPv6 only environments. That is, no claimed capabilities are invalidated if this product is deployed in a network environment that does not support Ipv4.							
	This SDOC contains a capabilities test reponds, the stacks/ports not covered are document from those reported are explained.	nented, and how their lpv6 capa	abilities differ		All of the products listed in the product family in section 5 are implemented such that their USGv6 capabilities are identical in form and function across the entire product family. The specific conformance and interoperability test results for the USGv6 capabilities of an identified member of this product family are provided in this SDOC. The SDOC attests that these tested USGv6 capabilities are identical and unmodified for all the products cited above.
